Barracuda 7200.11
1500 Gbytes

S/N: 9VS45XV5

ST31500341AS

P/N: 9JU138-302

Firmware: CC1H

Date Code: 10472

Site Code: TK

+5V 0.72A
+12V 0.52A

Product of Thailand

Caution. Product warranty is void if any seal or label is removed, or if the drive experiences shock in excess of 350 Gs.

STX-720011 (B)

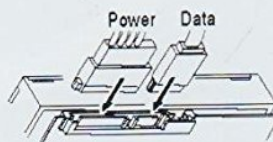

Need Support? Visit www.Seagate.com.

Installation Summary

For easy installation use Seagate's DiscWizard™ software, available at www.seagate.com/support. Always backup critical data before making changes.

Serial ATA controllers and system BIOS have several setup choices. See your controller or system documentation for specific options and any custom device drivers.

1. Mount the drive using two screws per side. Do not over tighten the screws.
2. Attach the cables. The data interface and power cables are keyed.
3. Run your computer BIOS/system setup program. Enable the new drive and set the options.
4. Prepare the drive for use with your Operating System. See your OS Help instructions for details. Be careful to select the correct drive. Windows® Vista or XP prepares the drive during installation. If this is a second drive, then Windows Disk Management can be used to prepare the drive. Use the DiscWizard software to copy data from an old drive to a new drive. Go to www.seagate.com/support and select installation for additional instructions and illustrations. Macintosh uses Disk Utility in the utilities folder.
